

Mike Coffman observes a researcher working with adult stem cells at the Anschutz Medical Center

“ I’ve worked very closely in support of adult stem cell research; my district includes the Anschutz Medical Center where the Charles Gates Center for Regenerative Medicine and Stem Cell Research is located. I’ve pressed for continued research on Capitol Hill and specifically for grant funding for the Gates Center. ”

- Mike Coffman

MIKE COFFMAN

Helping defeat cancer and other diseases

Mike Coffman views an adult stem cell under the microscope

Dear Neighbor,

I think every American has lost a loved one to cancer or other deadly disease. It's even worse when that loved one is a child.

That's why I've made it my priority in Congress to fund the kind of medical research that helps find the cures that can prevent these heartbreaking losses. We have some of the best and brightest medical professionals in the world working every day to give sick men, women and children a ray of hope.

We have a moral obligation to continue this research... to even increase it until the battle is won. That's why I'm writing you today. Fighting and defeating diseases that devastate families is not a partisan issue. It's an issue we can all come together on.

A handwritten signature in black ink that reads "Mike Coffman". The signature is written in a cursive, flowing style.

U.S. Representative Mike Coffman

U.S. Representative **MIKE COFFMAN**...

Supported the Kids First Research Act of 2013 (H.R. 1724), which provides for a comprehensive 10-year pediatric research initiative administered by the National Institutes of Health.

Supported the Patients First Act of 2013 (H.R. 1740). This law increases stem cell research, which has shown evidence of real clinical benefit to patients.

Endorsed grant applications for the Gates Center's research of adult stem cells at the Anschutz Medical Center – the results of which can go towards fighting leukemia and breast cancer.

Worked to secure funding for the National Institutes of Health to further medical research and find cures for diseases like childhood cancer.

Supported the Childhood Cancer Survivors' Quality of Life Act of 2013 (H.R. 2058). This law improves and enhances research and vital programs related to childhood cancer survivorship.
